Professional Summary

Software & Test Automation Engineer with 2+ years at FEV eDLP, specializing in battery test automation, CAN network analysis, and Python tooling for BMW projects. Holds an M.Sc. in Automotive Software Engineering (TU Chemnitz) and independently builds AI-powered applications using OpenAI API and Llama-3, with growing expertise in Agentic AI and multi-agent systems.

Education

Apr 2019 – Mar 2023 **Chemnitz University of Technology**, M.Sc. in Automotive Software Engineering

Sep 2014 – Aug 2018 **J.B Institute of Engineering and Technology**, B.Sc. in Information Technology

Work Experience

- Nov 2023 – Present **Software Application Engineer, FEV eDLP, Sandersdorf**
- Led validation and automation for BMW automotive battery testing projects, ensuring compliance with project specifications
 - Developed and executed automated test scripts using **Morphee**, improving testing efficiency and coverage
 - Performed CAN network analysis using **CANalyzer** to identify and resolve communication issues during debugging and validation
 - Implemented test scenarios based on project requirements in close collaboration with project engineers
 - Built a Python-based CSV to MTable conversion tool for Morphee test workflows, reducing manual data preparation from hours to minutes
 - Developed a custom Python interface enabling seamless inter-tool communication for vibration testing
- Oct 2022 – Apr 2023 **Master Thesis, FDTech, Chemnitz**
- Developed and validated AI models using **TensorFlow** and **Scikit-learn** for automated vehicle test evaluation
 - Designed test scenarios compliant with **ISO 15622** (Adaptive Cruise Control – ACC)
 - Evaluated vehicle behavior in **CarMaker** simulation environment and implemented corresponding test cases
 - Benchmarked AI-based evaluation against traditional test automation tools, demonstrating measurable accuracy improvements
- Sep 2021 – Sep 2022 **Working Student, FDTech, Chemnitz**
- Automated report template generation using **BIRT** integrated with **Test-Guide** for ECU Test workflows
 - Implemented a REST API library in Python connecting the **Test-Guide** reporting tool with the **Visure** requirements management platform

Nov 2020 – May
2021

Internship, ROKIN GmbH, Munich

- Developed responsive frontend interfaces using **HTML**, **CSS**, and **JavaScript**
- Implemented full-text search functionality using **Elasticsearch** and **Kibana** (Docker)
- Deployed and managed applications on **Google Cloud Platform**

Projects

Oct 2017 – Apr
2018

Personal Portfolio

Personal portfolio website showcasing skills and projects, built with HTML, CSS, and JavaScript.

Nov 2025

AI Code Safety Reviewer

AI-powered static code analysis desktop tool built with Python, CustomTkinter, and OpenAI API to identify security vulnerabilities and code quality issues.

May 2026

NeEvo – AI Automation Assistant

Python desktop application powered by Llama-3 for intelligent task routing, featuring a persistent background thread and custom Tkinter interface to autonomously orchestrate complex user intents and extensible background automations.

Skills & Abilities

Languages & Database

Python, C, JavaScript, MySQL, HTML, CSS, MongoDB

Software & Tools

Morphee, CarMaker Simulator, BIRT, Test-Guide, ECU-Test, Elasticsearch, Google Cloud Platform, CANalyzer, HIL Simulation, Git, Jira, Confluence, Sphinx

Frameworks & Libraries

Django, Tkinter, CustomTkinter, TensorFlow, OpenCV, Pandas, NumPy, Matplotlib, Scikit-learn

AI & LLMs

OpenAI API, Llama-3, Agentic AI, Multi-Agent Systems

Certifications

Aug 2021 – Jan
2022

Advanced Driver Assistance Systems (ADAS)

Nov 2021 – Jan
2022

Learn HIL Testing from Scratch (Hardware in the Loop)

May – Sep 2021

The Complete Self-Driving Car Course – Applied Deep Learning

Jan 2026 – Mar
2026

Build Agentic AI & Multi-Agent System for Software Testing

Course Studies

- Image Understanding
- Software Platforms for Automotive Systems
- Automotive Software Engineering
- Hauptseminar (Car 2X Communication – Concepts & Limitations)

Languages

English

Advanced – C1 level

German

Intermediate – A2 level
